EDUCATION

Kennesaw State University || **Exp. Graduation Dec 2025** || Bachelor of Science in **Software Engineering** Minor in **Mathematics**

- GPA: 3.93 || President's List Spring 2022; Fall 2022; Spring 2023; Summer 2023, Spring 2024 || Dean's List Fall 2021; Fall 2024
- **Honors Scholar**
- **Clubs/Organizations: Women in Tech Campus**

SKILLS

Programming Languages: C#, Javascript, HTML/CSS, PHP, React Javascript, Typescript, Java

Communication Skills || Customer Service || Management Skills and Experience || Leadership || Time Management || Social Skills || Understanding of SLDC || Git || **Secret Clearance**

EXPERIENCE

Student Assistant – Web Development || **GEORGIA TECH RESEARCH INSTITUTE** || Aug 2023 – Present || Atlanta GA

- Key developer on a critical, **high-priority** procurement application for the ELSYS lab, now expanding **GTRI-wide** due to its success; leading to direct feature requests from multiple labs and GTRI leadership.
- Balances **bug fixes**, new **features**, and improvements through involvement in the **full-stack development** of ELSYS IT tools using **Agile** methodology, **PHP, HTML, Javascript, SQL, Doctrine Dbal, MariaDB Databases**.
- Designed and implemented a major workflow, including **database migrations, backend architecture, and frontend UI components** for both user and management interfaces.
- Built and enhanced an IT ticketing progress **dashboard**, adding **key metrics** and tables of live data in a **user friendly interface** to provide real time insights for management.

Software Engineering Intern || **INTEL** || May 2024 – Aug 2024 || Atlanta GA

- On the NEX team, involved in **full stack development** of an internal application that streamlined creation of VMs, servers, and network spaces, which transformed a week long manual **server setup process** into an automated, **self-service** web app, reducing setup time to a few hours, significantly boosting productivity.
- Led the **entire frontend development** of the application targeted towards efficiency for Intel's infrastructure, with the execution and utilization of **React Javascript** and **Typescript** with the custom **Carbon Design UI** library.
- Completion of **Jira sprint tasks** that include implementation of custom filtering, sorting, pagination features, and data manipulation from API calls using **ASP .NET Core 8**, ensuring seamless backend integration.
- Work also includes **NextJs App Routing** architecture, addition of logs within the backend framework using **model-view-controller** design pattern, **database migrations**, and creation of **REST API endpoints** and testing.

Corporate IT Intern || **REPUBLIC NATIONAL DISTRIBUTING COMPANY** || May 2023 – July 2023 || Atlanta GA

- Supporting Warehouse Management Tools operations on **full stack development**.
- Assisting in creating endpoints within the backend, unit testing, creating components in the frontend and presenting demos of completed UI application work to business leaders of the company.
- Innovated ideas on an intern capstone project, resulting in a company-wide overhaul of the internship program.
- Gained hands-on experience with **API's, React, HTML, C#, Javascript, Redux, NodeJS, MaterialUi, VS Code, Github, Databases (MySQL), and MVC processes**.

PROJECTS

Fetch My Story || **Angels Among Us Pet Rescue** || Foster Communication and Pet Bio Generation application

- Integrated **AI-powered voice-to-text transcription** and sentiment analysis to streamline pet bio generation and foster communication.
- Lead and delivered the frontend of the application, resulting in a **user-friendly interface** using tools such as **React Javascript, HTML, CSS, and MaterialUi**
- Showcased the ability to create impactful, real-world solutions through cutting-edge technology and secure system design.
